

Science week

This week we celebrated science week throughout the school. We carried out 'wow' science experiments and the children have really enjoyed this shared experience with their whole class, making memories and being wowed by the wonders of science. All the experiments the children have done, are really simple and easily replicated at home.

Year 1: In Year 1 the children found out if you could turn milk into plastic! If you would like to have a go at this simple experiment at home, with your grown up supervising, please follow this link for the instructions: <https://www.youtube.com/watch?v=RF-aET54CGk>

1HC class also carried out the Oobleck experiment in which they mixed cornflour with water, rolled it into a ball and watched as it changed. The children really enjoyed watching it act as a solid and a liquid.
